

STILL CREATING, STILL INNOVATING.

PECO NEWS

SPRING REPORT 2017

DUE IN 2017

OO SCALE BULLHEAD LARGE RADIUS TURNOUT >>>

Having listened to the arguments for and against producing a 'British-style' track for OO scale we are delighted to have released a new Code 75 flexible track at the end of 2016. For use with OO/HO scale, 16.5mm gauge rolling stock, the track reflects the various design details associated with bullhead track, using high quality nickel silver rail and featuring some very nice moulded detailing. Sleeper spacing and length will satisfy most modellers looking for a visual representation of this common British track design. Plans are advanced to release complementary rail joiners very soon (with bolt detail). Large radius turnouts will also be released in 2017 to match this new track. These turnouts will conform to our standard turnout geometry.

O GAUGE SETRACK TURNOUT >>>

Although we were forced to postpone the production of these much-awaited turnouts, work is ongoing now to prepare these for 2017. These turnouts will feature the new Unifrog design: a separate frog tip, so works like an Insulfrog, but with wiring included to allow simple modification to make the frog tip live, just like Electrofrog!

OO-9 ROLLING STOCK >>>

We are busy expanding our range of ready to run OO-9 rolling stock. The latest models include these lovely Ffestiniog Railway Slate Waggons, supplied in packs of 3. The models feature a separate slate load, and lots of subtle detail, capturing the character of these little vehicles. Unpainted pre-production samples shown. Plans are also being drawn up for a new Lynton & Barnstaple Centre Observation Coach for 2017. Other OO-9 vehicles are under consideration/development too!

PECOLECTRICS TURNTABLE MOTOR >>>

PECO LECTRICS

PL-55 Turntable Motor

- Compatible with all PECO turntable kits
- Can be retro-fitted to installed turntables
- DC or DCC operation
- 12vDC motor, pre-set with 24 x 15 degree stopping points
- Simple push-button control: press once in either direction for one stop, hold and release to move deck to desired track. Reset button takes deck back to starting point.

PECO OO/HO OHLE >>> DUAL-TRACK GANTRY

We are currently working in collaboration with Sommerfeldt, Germany, on a dual-track gantry to complement our new British outline OHLE all-metal system. Details have yet to be finalised but the aim of the design would give the modeller the option to add extension pieces to cover multiple tracks.

PECO STATIC GRASS SYSTEM >>>

Sales are anything but 'static'! Since this new line was introduced in July 2016, sales of our new Pecoscene Static Grass range have stormed ahead. The excellent value of the Pro Grass Micro Applicator is clearly attracting many sales, but also careful selection of colours for the various grasses has appealed to lots of modellers. The range will be expanding during 2017 — watch out for more news!

RAILWAY MODELLER & CONTINENTAL MODELLER >>>

Great Britain's most popular magazines dedicated to the hobby, catering for modellers of all gauges, ages and abilities — every month!

These leading titles are also available as digital versions so readers can view their favourite magazines on the move. Including fully searchable back issues dating back to January 2011 — for your PC, Mac, tablet or mobile device.

ABOUT US

PECO 70TH ANNIVERSARY CELEBRATIONS >>

The company marked 70 successful years of business with the naming of a locomotive in June 2016. The nameplates were unveiled on Class 56 locomotive no. 56302, belonging to Colas

Rail Freight, at a special event held in Minehead, Somerset, headquarters of the West Somerset Railway, one of the UK's leading heritage lines.

A large group of PECO staff and their families enjoyed a day out on the line, as well as participating in the naming event itself. PECO is extremely grateful for the generous help and co-operation given by our friends at Colas Rail Freight, and all the staff at the West Somerset Railway, ensuring that our day of celebration was one to remember!

VISIT THE HOME OF PECO >>

PECO stands proudly above the village of Beer, high on the hillside overlooking the sea. In fact, it is located at the Heart of Lyme Bay in the middle of the World Heritage Jurassic Coast. The 9 acre site includes the manufacturing production unit, offices for the famous and well patronised PECO products and magazines and one of the South West England's best loved tourist attractions, PECORAMA. It is a place for model railway enthusiasts to come and be inspired and a playground within colourful and imaginative grounds that is suitable for families of all ages to enjoy.

The magazines RAILWAY MODELLER and CONTINENTAL MODELLER are both prepared and published within the offices, whereas the printing and despatch is undertaken elsewhere in the UK. As far as we know, there is no other model railway manufacturer, publisher of model railway magazines and textbooks and tourist operator quite like PECO, for it is a business run by enthusiasts for enthusiasts and their friends. We are here as a family-run business ready to serve.
